JJC

JJC HR Series Remote Handle Pistol Grip features finger grooves for ergonomic operation. After plugging the ACC socket of HR handle and the camera's remote socket with JJC cable, you can shoot by pressing the shutter button of HR. At the left side of the handle, a LOCK button is used to lock the camera shutter for long exposures or continuous shots. The HR handle has a 1/4"-20 male mount on the top, for sturdy attachment to cameras by twirling the thumbwheel. The silicone cushion is effective to prevent the bottom of camera from abrasions. There's also a 1/4"-20 tripod socket at the bottom of HR handle, which allows you to attach this handle to a tripod for shooting. No battery is required for HR handle, allowing a convenient and quick use. HR handle not only enables to release shutter by one hand, but also ensures stable camera operation for more satisfying images.
