

JJC Remote Controller SR-MU1

JJC SR-MU1 remote controller allows you to remotely control selected SONY camcorders with MULTI Terminal, in this way to prevent camcorder shake during a video or taking a photo. Then you will get more perfect videos or pictures. In addition, it also has a clip for you to clip the remote to a tripod for stability. The cable's length is up to 1.5m.

Functions Description

Power Switch: allows you to turn on/off your camcorder remotely

PHOTO Button: allows you to capture a photo

START/STOP Button: allows you to start and stop a video

Clip: allows you to clip the remote to a tripod during video recording

Cord: length up to 1.5m
